Street: City:
54, 2666 Necochea, CP 7630

Working Experience

Project “LeadBox invoice Manager”

Front End Developer

I joined as part of a team of react programmers. I participated in the creation of individual views as part of a central component that unifies the views and shows them by default in the main panel when the user first enters.

Freelance Projects (Upwork)

Front End Developer

In the last +2 years I have worked individually programming minor projects using React+Scss as the main stack or SiteBuilders such as Astro and to a lesser extent Next.

- Jamstack Blog [ASTRO/SCSS/Payload] [Next/CSS/Sanity]
- Funnels for businesses such as: “lawn mowing”, “airbnb co-hosting”, etc.
- Email Templates for marketing agencies [HTML/CSS]
- Landing pages for ecommerce

Certifications

Advanced UX Design

Desiré Marrón Carmona

This course has been very useful to me when making decisions on interface design taking into account user experience as a guide.

<https://bit.ly/uxLinkedin>

Linkedin Learning

Modern JavaScript ES6

Juan Pablo de la Torre Valdéz

Through this course I learned from programming logic to consuming different REST APIS with JSON and Fetch API + Async / Await, and I also tackled my first projects.

About Me

I am a frontend developer. I learned how to develop websites with React through online courses and Open Source projects on GitHub.

I have experience working in teams of developers programming React components and as a freelance developer programming individual projects such as jamstack blogs, landing pages and other smaller projects.
